

AXIC-WP - 47811

Work positioning rope in accordance with EN 354:2010 and EN 358:2018, for positioning and securing at height. The length of the AXIC-WP can be adjusted quickly and easily using a rope clamp.

Product description

- Lanyards for work positioning according to EN 354:2010 and EN 358:2018.
- A continuous adjustment system allows precise adjustment of the required length and provides a comfortable working position.
- The edge protection protects the rope from wear at rough contact points and facilitates the passage of the rope.
- Suitable for people up to 150 kg.
