

EFA B - 41257

For flexible applications in electrical or chemical environments and for working under voltage.

Product description

- For flexible applications in electrical or chemical environments and for working under voltage.
- Stiles and rungs made of glass-fibre-reinforced plastic for particularly high chemical resistance.
- Complies with the high-voltage test for ladders of insulating material in accordance with DIN EN 61 478 or VDE 0682 Section 6.5 Category 1/30 KV.
- Resistance to ageing in accordance with DIN EN ISO 4892-2.
- Suitable for working in high-voltage environments (1000 V AC, 1500 V DC).
- Stiles and rungs (30 x 30 mm) made from glass-fibre-reinforced plastic for particularly high chemical resistance.
- High-strength perlon belts prevent splay.
- Replaceable 2-component plastic end caps ensure positioning without the risk of slipping and at the same time provide firm seating in the stile.

Hints and special features

Complies with EN 131 Professional.
