

AETHOR 1.8 - 47865

The AETHOR 1.8 self-retracting lifelines comply with EN 360:2002 and offer excellent freedom of movement while limiting the fall distance. The automatic line retractor ensures that only the required length of rope is released, so the arrest distance is always as short as possible in all situations, whether in overhead (max 140 kg) or horizontal applications (max 100 kg). This device is certified for use in situations where the anchor point is at ground level (fall factor 2). It is suitable for people weighing up to 140 kg. Line length of 1.8 m for use on elevating work platforms (DIN 19427).

Product description

- DIN 19427
- Fall factor 2 certified.
- Robust, yet compact and lightweight, weighing just 800 grammes.
- Robust thermoplastic housing.
- Length 1.8 m
- Edge-suitable RfU 11.060 (max. 100 kg)
- Suitable for people weighing up to 140 kg (fall factor 0).
- Swivel and connector for connection to anchor point.
- Swirl and drop indicator on tri-lock connector
- Equipped with energy absorber according to EN 355.
