

Helicopter docks

Modular ZARGES docking system – from the nose to the tail – for both civil and military helicopters.

Product description

- Several narrow modules for different types of helicopters, suitable for both small- and large-scale maintenance work.
- Optimum adaptation to contours with high variability.
- A variety of railing options, including fixed or height-adjustable railings, foldable railing cages, and telescopic fall protection devices for connecting two roof working platforms above the vehicle roof.
- Sliding panels and bumpers.
- Outriggers have height adjusters to compensate for uneven ground.
- With fixed or adjustable height.
- Fixed or with chassis for mobile applications.
- Modular, deconstructable or single-piece design.
