

R3

R3: Fast. Rigid. Reusable.

Product description

- The ZARGES R3 concrete anchor is a reusable, safe and reliable anchor point for horizontal, vertical or overhead applications. A quick-release button allows users to easily install and remove the anchor, boosting productivity. The robust design and extremely hard carbon coating enhance durability in all types of concrete. The structural anchor is designed to be omnidirectional, allowing the connection to rotate 360 degrees and swivel 180 degrees back and forth for improved joint compatibility
- Simple single-handed operation with push-to-stop installation - no tools required
- Quick-release button for ease of removal
- Extremely hard carbon coating
- Cycle test carried out for 5,000 operations
- Forged stainless steel D-ring with swivel
- EN 795:2012 Type B
- For a maximum of 1 user (up to 300 kg)
- Tested with 18 kN according to EN 795
