

## Battery Case - 40582

For the safe storage and transport of defective or damaged lithium batteries in accordance with ADR P908 and SV 376.

## **Product description**

- Maximum fire protection and easy handling thanks to the fireproof, one-piece interior construction, which also helps to avoid incorrect use.
- Hazardous goods packaging certified for lithium-ion batteries UN 3480, UN 3481.
- Suitable for transporting prototypes, damaged or defective batteries, critically defective batteries and batteries for disposal and recycling.
- Successfully fire-tested: flame does not spread to adjacent batteries, temperature on the container surface remains below 100°C.
- Padding and absorbent material are nonflammable, non-conductive and dust-free.
- Maximum outside temperature below 100°C, no flames or splinters escaping in the event of an accident.
- Capacity per compartment approx. 500 x 150 x 150 mm.
- High-quality special container made of aluminium.
- Equipped with fireproof padding and absorbent material made of textured glass fibres.
- Dust-free interior fittings.
- Tested and approved as hazardous goods packaging in accordance with UN requirements, i. e. can be

transported on public roads.

- For storage and transport of defective or damaged lithium batteries in compliance with ADR special provisions 376 and packing instructions P908.
- New: Meets the specifications laid out by BAM in Special Provision SV 376 for the transport of critically defective lithium batteries.
- Follow the operating instructions.
- Made in Germany

## Hints and special features
