DATA SHEET

Battery Case

For the safe storage and transport of prototypes (ADR P910) and defective or damaged lithium batteries in accordance with ADR SV 376 and P908. Specifications are also available for critically defective lithium batteries in accordance with P911.

PRODUCT DESCRIPTION

- Dust-free interior with fireproof padding and absorbent material made of textured fibreglass.
- Tested and approved as hazardous goods packaging in accordance with UN requirements, i.e. can be transported on public roads.
- Successfully passed a real-fire test for batteries with a rated energy capacity of approximately 814 Wh. The temperature on the container surface remains below 100°C. Due to numerous influencing factors, such as cell chemistry and design, please contact ZARGES for further information.
- High-quality special container made of aluminium.
- With fire-resistant padding and absorbent material made of textured glass fibers.
- Dust-free interior fittings.
- For storage and transport of defective or damaged lithium batteries in compliance with ADR special provisions 376 and packing instructions P908.
- Authorization for the transport of critically defective lithium batteries in accordance with P911, SV 376, and BAM regulations. Please request this from ZARGES.
- Made in Germany
